

# Zone 3

## **Come and learn more about Metrology to enhance your knowledge and skills**

**New for 2014 the CMSC Measurement Zone**

### ***Zone 3: Metrology and measurement uncertainty Elearning sessions***

Come and register for the Elearning tasks in Measurement zone 3. Understand core principles of metrology, dimensional measurement and measurement uncertainty by trying the online modules using smartphones and tablet technology. Use this to support your knowledge and understanding requirements for your personal development, business benefits and to support the CMS certification body of knowledge.

Watch this space for more details about registration

The purpose of the 2014 measurement zone is to provide knowledge and understanding to support your metrology education. In addition, the objectives are to engage with the CMSC community in the practical methodology required to educate and support certified operators and programmers.
