

Zone 4

Come and learn more about best practice and certification to enhance your knowledge and skills

New for 2014 the CMSC Measurement Zone

Zone 4: workshops

Come and register for the workshops in Measurement zone 4. Understand best practice principles of using laser trackers presented by Ben Hughes of the National Physical Laboratory. Engage in interactive Elearning presentations on metrology and come and engage in an interactive session about the CMS certification Level 1 and 2 certification process.

Watch this space for more details about registration

The purpose of the 2014 measurement zone is to provide knowledge and understanding to support your metrology education. In addition, the objectives are to engage with the CMSC community in the practical methodology required to educate and support certified operators and programmers.
